

Own a piece of the famous Inyo Locomotive

You can own an actual piece of boiler tube from the Virginia and Truckee locomotive #22, “The Inyo”.

These tubes were installed in 1983 and removed in 2024 as part of a major overhaul.

Each tube is approximately nine inches long and will come with a wood display stand and certificate of authenticity.

All proceeds will go toward the restoration of the locomotive.

More information will be available soon by scanning this QR CODE:
